PRODUCT SPECIFICATIONS

MATERIALS

Extruded vinyl profiles comply with the performance requirements of AAMA 303. The colors extend through the profile of the extrusion with White and Desert Sand colors available. The product is not available in the Western United States markets.

FRAME

All frames and sash are assembled utilizing fusion-welded technology for added strength and durability. The frame jamb width is 3-5/8" (92.97mm), and the nominal extrusion exterior wall thickness is 0.060". The wall depth of the double-hung product is 2-1/2". The frame incorporates a traditional brickmould profile with an integral j-channel and nailing fin. The Brickmould Double-Hung product is designed with a traditional 5/4 (1-1/4") sill to match a traditional double-hung appearance. Additionally, the Brickmould Double-Hung window is designed with a sloped sill to maximize water runoff. Weep holes are included on the frame to ensure standing water is directed to the exterior plane of the unit. An interior accessory groove is standard to accommodate various frame accessory and assembly options on the product.

SASH

The tilt sash is 1-3/8" (35.18mm) nominal thickness and is assembled using fusion-welding technology for added strength and durability. The sash also uses a steel reinforcement bar in the horizontal working rail of each operating sash for additional strength.

GLAZING

3/4" (19mm) insulating glass consists of two lites of glass sealed around a spacer. The glass is mounted into the sash using a silicone-glazing compound. The insulating glass units comply with the performance requirements of the IGCC in accordance with either ASTM E774 or E2190. All units are exterior glazed.

GLAZING OPTIONS

3/4" (19mm) insulated glass is available in clear, Low-E or Low-E 366, tinted, obscure, or other specialty insulating glass as specified. Many glass options are available in tempered glazing.

WEATHER-STRIPPING

A fin-pile weather-strip is applied along dual full perimeters of operating sash. A high performance foam filled weather-strip is used at the meeting rail. In addition, an engineered TPE weather-strip is utilized on the bottom rail to provide maximum performance.

HARDWARE

A single action cam style lock is available on all windows. Block and tackle balance systems are utilized to support the vertical operation of the sash. Low profile thumb latches (sash retainers) and pivot pins are equipped for utilization of the "tilt" function.

INSECT SCREENS

The optional overlay full view fiberglass charcoal color insect screen is set in an aluminum frame to match the color of the unit. The screen is secured to the window using a pin and spring loaded plunger system. Insect screens are intended to allow air and light in and to keep insects out. They are not intended to keep anyone or anything from falling through an open door or window. For safety screens or other security devices contact your local building supply retailer.

GRILLES

GBG (Grilles between the Glass) - 5/8" (16mm) and 7/8" (22.2mm) flat or 1" (26mm) contour grilles mounted between the glass panes suspended within the air cavity and color matched to the extrusion color.

SDL (Simulated Divided Lite) - 7/8" (22.2mm) color-matched contour muntins surface mounted on the exterior surfaces of the insulated glass unit to provide a true divided lite appearance.

EXTENSION JAMBS

Extension jambs are regionally available for JELD-WEN Vinyl products. The 4-9/16" and 6-9/16" extension jambs are available in pine clear vinyl wrapped, primed wood, red oak and maple finishes and can be specified on three or four sides of the product.

ADDITIONAL ACCESSORIES

Additional accessories are available for JELD-WEN Vinyl products. Please contact your local building supply retailer for a complete listing of the additional accessories.

INSTALLATION

Installation per JELD-WEN Installation Method for Vinyl Windows JII001, JII010 or JII011. See www.jeld-wen.com/resources for instructions.
